

Collaboration to Improve Community Health

An integrated approach to coordinating multiple prevention efforts in a single community

How Partners is Organized

4 full-time staff members and2 part-time staff members

- A 501(c)(3) directed by a 25-Member Steering Committee
- Work with, but not for, the City Health and School Departments
- Funded by DoN support from two local hospitals

Our office

But we maintain the largest Fall River-based web site (HealthyCityFallRiver.org) As well as the only health & human service blog site at MyFallRiver.org.

World Health Organization

Partners follows the WHO definition of a healthy community that has:

- A high level of community participation
- Preventative health care services
- A non-violent, safe environment
- Affordable housing
- Employment and educational opportunities
- Accessible recreational resources
- Safe and healthy workplaces
- And, accessible transportation

Fall River has many challenges

- High rate of adults and children in poverty
- Low levels of education
- High numbers of homeless
- High rates of tobacco and substance use
- High rate of blood pressure and cholesterol
- High rates of heart disease and heart attack
- High rates of obesity and diabetes
- High rate of lung and throat cancer
- Low rates of breast-feeding
- Poor nutrition and lack of exercise

So, what can we do to change this?

Improve access to health care

Educate the population

Improve the environment

Change laws and regulations

Engage everyone in making changes

We conduct community-wide assessments

We develop plans every 5 years: 2015-2019

Plans are based on these
eight strategies that affect
health outcomes as outlined
by the Population Health
Institute and the Robert Wood
Johnson Foundation

Diet & Exercise

Tobacco, Alcohol & Drugs

Infectious Disease

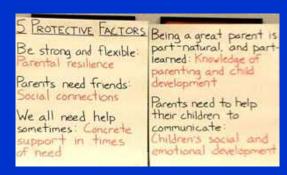

Access to Health Care

Education & Employment

Community Safety

Family Support

Environment/Infrastructure

We then address 62 specific objectives

- Because no one presents with just one health problem, we need to address multiple problems together.
- Everything we do to accomplish these objectives is done through partnerships.
- We are known for across the state and across the nation for the effectiveness of our collaborations.

We won the RWJF Culture of Health Prize

It was that collaboration that earned us one of six national awards by the Robert Wood Johnson Foundation in 2013 and a return visit to Princeton every year thereafter. So what do we do to earn it?

We collaborate to reduce the use of tobacco

- •We work with state agencies and local businees
- •We advocate for education and reduced access for children & adolescents
 - •We also provide smoking cessation treatment for current smokers

We collaborate to lower alcohol & drug use

- Active efforts to eliminate youth use of alcohol
- Ongoing work to take back prescription drugs
 - Enforcement of drug paraphernalia laws

We collaborate to reduce youth violence

Active work with street youth and in-school youth & annual Peace By Piece gathering

We collaborate to suport homeless families

We collaborate to support walking and biking

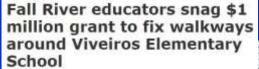

We collaborate for safe routes to school

We collaborate on the Fitness Challenge

Over 20,000 pounds lost!

Now the longest running public fitness challenge in America!

Over 3,000 adults & 20,000 students

We collaborate on access to healthy food

Encouraging greater consumption of fruits & vegetables among low-income populations

We collaborate to educate about sugar

We collaborate on environmental change

support healthy activity

We collaborate on worksite wellness

Shioban E. Torres Massachusetts Department of Public Health

And, we collaborate with medical care providers

- Education and support for Community Health Workers
- Health promotion in medical care with the \$1.72 million Mass in Motion "1422" grant and SSTAR's \$1.6 million Health Integration Project.

Our priorities for Health Improvement

Community-wide prevention:

- Tobacco and substance abuse prevention
- Prevention of youth violence and prejudice
- Protective factors for youth development
- Improved school health and wellness
- Reduced impact of homelessness
- Ensuring secure and stable families
- Improved supply of healthy food
- Increased opportunities for fitness
- Promotion of walking, biking and bus travel
- Medical care that focuses on prevention
- Worksites that promote employee health

What do we expect from this effort?

A continuing collaborative effort involving all sectors of City government and local organizations can produce:

- Lower crime, better parks, cleaner streets, improved education levels, healthier children, and more productive employees
- Change in the image of Fall River toward a positive self-image and a higher quality of life
- ➤ Evidence that health behaviors are trending in a positive direction
- ➤ A positive sense that people are turning their lives around

 The Centers for Disease Control and Prevention grant to prevent and control chronic diseases

 The MA Department of Public Health received one of twenty-one awards totaling \$69.5 million to prevent obesity, diabetes, heart disease and stroke (DP14-1422PHF14 or "1422" grants)

 Fall River was one of four Mass in Motion Communities to receive a \$440,000 grant each year for four years.

Stanley Street Treatment and Resources
 (SSTAR) is managing this grant in collaboration
 with City's Mass in Motion Project.

 Prevention half is centered on one mile radius from the Quequechan River Rail Trail

- Increase non-vehicular recreational and functional travel
- Improve quality food options while reducing availability of tobacco and alcohol

 Clinical half is working with diabetic, prediabetic and hypertensive patients

 Work with community health workers to ncrease physical activity and improve food choices

Low-carb Nutrition Education

erts do not agree with the DA Dietary Guidelines nes to fat and carbs

commendations have eled the obesity and risis in America and world

Policy

David Ludwig, M.D., Director Optimal Weight for Life (OWL) program at Children's Hospital, Harvard School of Public Health

- Current science points to lowering carbohydrates and increasing health fats to increase satiety and nutrition
- Partners has adopted this point of view and actively supports it through its food recommendations and education programs

Low-carb Nutrition Education

 We've been working with Southcoast Diabetes Educator Amanda Raposo, RD.

 We offer a 15-week low-carb education and support group through the Fitness Challenge and diabetes education talks
